## Pesticide Application Notification Request

St. Patrick School adheres to an Integrated Pest Management Plan in accordance with Title 61, Series 12 rules of the West Virginia Department of Agriculture. Pests are controlled primarily through preventative measures. When pesticides are required, the least hazardous materials will be used.

Pest management methods are classified as Level 1, Level 2, Level 3, and Level 4, depending upon their toxicity and the degree of hazard associated with their application.

- Level 1- Non-chemical (preventive)
- Level 2- Least hazardous (low toxicity, non-volatile baits or dusts)
- Level 3- EPA Caution (limited volatility liquids)
- Level 4 - EPA Warning or Danger (broadcast and space treatments, spraying and fogging)

As a parent or guardian, you have the right to be notified if and when Level 3 or Level 4 pesticides are to be applied. To receive such a notification please complete the information request below and return this to the school principal.

NOTE: Levels 3 and 4 are not applied when students are in the areas being treated.

---

To: Father Douglas Ondeck

August 15, 2022

- I wish to be notified when Level 3 or Level 4 pesticides are applied at St. Patrick School.
